Design Choices and Explanation

1. Layout:
   - The webpage features a clean, user-friendly design with a prominent accordion occupying the main vertical space. It is fully responsive, ensuring a smooth experience across all devices.
2. Accordion Functionality:
   - The accordion slides vertically, with smooth transitions between panels. Each panel represents a section of the biography, like "Personal Background" and "Education." JavaScript ensures the active panel is clearly indicated.
3. Pagination Component:
   - Pagination is placed below the accordion for easy navigation. Active pages are highlighted, and users can switch between panels using Previous/Next buttons, creating a seamless user experience.
4. Content & Design:
   - The content is well-organized, with images and headings to improve readability. A consistent color scheme and typography ensure visual appeal, and the design is responsive for all screen sizes.
